**Regular Meeting of the
COMMUNITY SERVICES COMMITTEE MEETING**
Thursday, October 4, 2012 – 12:00 p.m.

City Hall North
First Floor - Conference Room A
1600 Truxtun Avenue, Bakersfield CA 93301

The meeting was called to order at [12:02 P.M.](#)

1. ROLL CALL

Committeemembers Present:

Councilmember Jacquie Sullivan, Chair
Vice Mayor David Couch
Councilmember Rudy Salas

Staff Present:

Alan Tandy, City Manager
Rhonda Smiley, Asst. to the City Manager
Steven Teglia, Asst. to the City Manager
Chris Huot, Administrative Analyst
Doug McIsaac, Community Development Director
Jim Eggert, Planning Director
Kate Shea, Planning Associate Planner
Ryan Bland, Community Development Coordinator
Stuart Patteson, Operations Manager

Ginny Gennaro, City Attorney
Richard Iger, Associate Attorney
Dianne Hoover, Rec. & Parks Director
Darin Budak, Asst. Rec. & Parks Director
Raul Rojas, Public Works Director
Brad Underwood, Asst. Public Works Director
Arnold Ramming, Civil Engineer
Ryan Starbuck, Traffic Engineer

Others Present:

Bob Smith, Bike Bakersfield
Antonie Boessenkool, Bakersfield Californian

Cindy Parra, Bike Bakersfield

DRAFT

2. ADOPT JULY 12, 2012 AGENDA SUMMARY REPORT

Adopted as submitted

3. PUBLIC STATEMENTS

None

4. DEFERRED BUSINESS

A. Discussion and Committee Recommendation Regarding Amenity Options for Planz and Siemon Pools – Tandy / Rojas

Administrative Analyst Chris Huot presented a report summarizing two community meetings held to obtain citizen feedback regarding potential replacement amenities for the dormant pools at Siemon and Planz Park.

Siemon Park

Nine members of the public attended the meeting; four indicated they favored a spray pad, four indicated they favored a pool, and one did not express an opinion either way. Councilmember Ken Weir indicated he favored a spray park.

Planz Park

Despite ample advance publicity, no members of the public were in attendance. Councilmembers Rudy Salas and Russell Johnson indicated they favored a hybrid skate park/picnic area concept.

Public Works Civil Engineer Arnold Ramming presented a report to the Committee detailing the spray pad amenity at Siemon Park and the hybrid skate park/picnic area amenity at Planz Park, including estimated costs, funding timeline and estimate time for design and construction of each amenity.

Committeemember Rudy Salas thanked staff for their outreach efforts and holding the community meetings.

Committee Chair Jacquie Sullivan asked if the skate park at Planz Park was going to be constructed as large as possible in accordance with the amount of area available.

Public Works Raul Rojas stated the skate park constructed will be larger than the current pool area. It can be expanded in the future if more area of the park is used.

Committeemember Salas made a motion to recommend the demolition of the dormant pool structures and replacing them with a splash pad at Siemon Park and a skate park/picnic area at Planz Park be forwarded to the full City Council for consideration.

The motion was unanimously approved.

B. Bike Transportation Plan Update – Tandy / Eggert

Planning Director Jim Eggert presented a report summarizing the progress of developing the Bike Transportation Plan (BT Plan).

The City entered into an agreement with Alta Planning and Design in July of 2012 to develop the BT Plan. The goal is to present a Final BT Plan to the City Council for adoption in April 2013.

Bob Smith with Bike Bakersfield asked if new bikeways, routes, and facility types would be included in the BT plan, in addition to what is already included in the General Plan. Mr. Smith also encouraged a bicycle tour as suggested in the consultant's agreement.

Community Development Director Doug McIsaac stated the consultant would not be limited to what is already described in the General Plan. The consultant will be developing new routes and facilities, and reviewing existing bikeways, routes, and facilities, for improvements.

Vice Mayor Couch asked that the consultant include an analysis of the feasibility of designating two east/west arterials and two north/south arterials, with wider bike lanes to be the preferred route for the biking community.

Committeemember Rudy Salas asked if the BT Plan would be adopted by April 2013.

Planning Director Eggert stated it may be possible to adopt the BT Plan by then. Several public workshops still need to be held. There is no time constraint related to the funding sources.

5. COMMITTEE COMMENTS

Committee member Salas thanked Mr. Smith for his assistance in acquiring the grant funding for the BT Plan. He also thanked staff for developing and initiating the installation of new amenities at Planz Park and Siemon Park.

6. ADJOURNMENT

The meeting adjourned at [1:05 P.M.](#)

MEMORANDUM
CITY ATTORNEY

February 21, 2013

TO: COMMUNITY SERVICES COMMITTEE
Jacque Sullivan, Chair
Bob Smith
[Ward 1 Vacant]

FROM: ANDREW HEGLUND, DEPUTY CITY ATTORNEY *AL*

SUBJECT: CITY OF OAKLAND'S EXCESS LITTER FEE

Our office was asked to learn more about the City of Oakland's excess litter fee and whether it would be practical to implement a similar ordinance in Bakersfield. The results of our research and analysis are outlined below.

* * *

In 2006, the City of Oakland adopted an excess litter fee designed to raise revenue to abate litter created by **fast food businesses, liquor stores, convenience markets, and gasoline station markets**. The ordinance required these select businesses to pay an excess litter fee based on the size of their business as follows:

Size of Business	Annual Gross Receipts	Annual Fee Assessed
Small Business	between \$5,000 and \$500,000	\$230
Medium Business	between \$500,001 and \$1,000,000	\$910
Large Business	over \$1,000,000	\$3,815

The revenue generated from the fee has been used by the City to defray the cost of litter and trash clean up resulting from the operation of these businesses. Locations within each of the city's districts were identified as areas that would receive increased clean-up funded by the fee.

The Oakland ordinance was not challenged legally; but the California Restaurant Association did speak in opposition to the ordinance and threatened a potential lawsuit. Interestingly, the City of Oakland did not conduct any environmental review as part of enacting the ordinance, an omission the city

acknowledges could have been an area of potential challenge by opponents of the fee.

It is also believed that perhaps the opposition to the fee has been non-existent because the ordinance contains an appeal procedure, which allows businesses to appeal the assessment of the fee if they are involved in other forms of litter abatement in the location of their business. Oakland also tried to reduce opposition to the fee by making a connection between the fee and targeted high density areas with significant litter.

Enacting an excess litter fee in Bakersfield under current laws may be much more difficult, if not impossible. Proposition 26 requires local governments to secure local voter approval before implementing certain fees. Generally, the types of fees and charges that become taxes under Proposition 26 are fees that the local government imposes to address health, environmental, or societal or economic concerns because these types of fees pay for basic services that benefit the public broadly rather than providing services directly to the fee payer. A litter fee would appear to fit within those parameters, thereby requiring voter approval.

BAKERSFIELD POLICE MEMORANDUM

Date: February 21, 2013
To: Alan Tandy, City Manager
From: Greg Williamson, Chief of Police
Subject: Police Response to Littering Incidents

Recent media coverage regarding a reported littering incident has brought attention to how the Bakersfield Police Department responds, and several factors which lead to a “non-response” by officers.

Littering is considered a misdemeanor or infraction in both the City of Bakersfield, and the State of California. According to case law, violators of misdemeanor crimes may only be arrested if the violation occurs in the presence of an officer, with a few exceptions. The arrest must be made in a public place, once again with a few exceptions. The exceptions allowed by case law do not include littering. The arrest must also be executed within a reasonable amount of time after observing the offense. Officers may accept civilian arrests of individuals for misdemeanors; however the same rules stated above apply.

An increase in Part 1 Crime (felony offenses), of approximately 18% has taken officers away from dealing with what are generally considered quality of life crimes including litter enforcement periods. Demands for police service continue to develop in all areas of the city to address various community issues. The Bakersfield Police Department tries to address these issues with a balanced approach.

Officers who observe littering offenses are expected to take enforcement action if they are not addressing or en route to higher priority incidents. During 2012, officers observed 44 littering incidents for which enforcement action was taken.

The Bakersfield Police Department has, at the request of Mayor Hall, conducted several traffic enforcement periods to address uncovered loads on the freeways that run through our city. During these operations we have partnered with the local California Highway Patrol office to conduct uncovered load enforcement on both State Route 99 and State Route 58. We will continue to request a partnership with the CHP to conduct these types of special enforcement periods.

The Bakersfield Police Department has worked with the Keep Bakersfield Beautiful (KBB) Committee and Mayor Hall to assist in improving our quality of life using a balanced approach to all other crime problems and additional community concerns. We will continue to work with KBB and the community to address the littering problem in the City of Bakersfield.

**CITY OF BAKERSFIELD
PUBLIC WORKS DEPARTMENT
MEMORANDUM**

TO: Community Services Committee
FROM: Raul Rojas, Public Works Director
DATE: February 20, 2013
SUBJECT: Caltrans Freeway Litter Report

In light of recent discussions both in the media and at our most recent City Council meeting, the Solid Waste Division has been asked to research some funding sources and identify parameters for removing freeway litter. After meeting with Caltrans, private sector "sponsors", the Bakersfield Homeless Center (BHC) staff, Kern Council of Governments (KCOG), and other partners, staff is prepared to propose a thorough freeway cleanup program at no cost to the City.

The cost to adequately perform system-wide monthly freeway cleanup in the City is anticipated to be around \$500,000. Funding for this program is expected to come primarily from Caltrans, who have stated that around \$250,000 (or even more) is available annually for two years to Bakersfield in the event the City coordinates freeway cleanups in the City. KCOG has recently indicated \$250,000 might be available through them. Additional funding is also anticipated from local private sector donors such as PG&E, Federal Express, KGET, and Kyle Carter, among others, who have expressed an interest in contributing financially and otherwise to a solution. Private sector funding would be "donated" into the Bakersfield Foundation. Funding from these sources would then be used to contract with the Bakersfield Homeless Center. Funding could also be used to pay for other costs associated with this program. The City already has a very successful agreement with BHC for this type of service at the Mount Vernon Green Waste Facility. Both the City and BHC are prepared to change the agreement to allow BHC clients to perform freeway cleanups. While \$500,000 is estimated for system-wide solutions, partial solutions (\$175,000) can mobilize a full-time crew and start to make a dent on the problem.

The role of the City must be explained here. Freeway litter is a Caltrans responsibility but reflects unfavorably on the City. The City, through its Solid Waste Division, is uniquely positioned to study and develop freeway litter solutions. Keep Bakersfield Beautiful, organizationally within the Solid Waste Division, has been working with the Mayor, Caltrans, and other stakeholders looking for a solution to this problem. The Solid Waste Division is most familiar and best positioned to coordinate and implement a solution that routes and schedules various work crews and volunteer groups into a system-wide plan. Through KBB, the City already has the contacts with volunteers, sponsors, potential labor sources such as Cal Works, KC Probation Dept., and KC Sheriff's Dept. We also already have a contract with BHC. Also important to note here is that not all litter is on freeways. A central scheduling and dispatch of crews to handle all litter problems, whether Caltrans freeways or City-areas, whether volunteers or paid,

provides the most comprehensive approach to this problem. While County freeway litter issues are not addressed here, they can be incorporated into this discussion as well.

Safety is the most critical concern to this endeavor. Freeway litter removal must be done with the utmost caution, and even with all safety measures implemented the task has inherent risk. It will be important to build this program with a safety first approach. Caltrans will need to provide traffic control as needed initially. Training for all crews working on main lines will occur, and signage should be available to alert traffic. Shadow vehicles, that block the path of oncoming vehicles from workers, will need to be in place. Volunteers will only be used on ramps deemed safe. BHC crews, who will be working the mainline, must have the proper safety equipment, will have to demonstrate the best safety training and procedures and these crews will need to be covered under the highest levels of insurance coverage. The City will need to protect itself from any liability associated with freeway litter clean up.

Historically, safety is often cited as the main reason why different participants don't get involved. If all potential parties excuse themselves due to safety, the litter on the freeway will remain and in fact get worse. Adequate safety procedures and protection from liability permits litter to be removed without putting the City at risk.

Other labor groups may become available in time to improve the ability of Caltrans or the City to clean up freeways. These other groups are welcome and may lower the cost of funding this program. The problem with other groups has in the past been reliability. That's why the BHC crews are such an important ongoing feature of this plan. As additional groups become available, to include volunteers such as the Mayor's Freeway Cleanups, they only make the program better. If prisoners become available again, whether through the State or the County, these groups will be scheduled accordingly. BHC crews can be reduced as necessary as the problem of freeway litter is alleviated and funding reduced accordingly. The BHC crews are paid for work performed only.

Of course, another feature of this program is providing a stepping-stone for high skill level homeless center clients to get back on their feet. But this is not a hand-out program. In fact, the Center is so eager to provide opportunities for their clients they have established extremely favorable rates to secure this opportunity, making it a great bargain for the City and Caltrans. But it is an important part of this program that while we are cleaning freeways that desperately need attention, we are creating the stepping stone for those in need to remove themselves from the cycle of homelessness and poverty.

In time, other duties may be desired such as landscaping, vegetative control, sprinkler repair, among other things. Once an agreement is in place with Caltrans, new duties can be added. At this point in time, it is not recommended within the scope of these agreements as it will affect prevailing wage and public works projects clauses, which would make this initial solution cost-prohibitive. But, with the framework established for cooperation between Caltrans and the City, these can be addressed in the future.

Recommendation:

The problem of freeway litter requires immediate response such as identified herein. As ideas and new solutions present themselves, they can be incorporated into this plan. Staff recommends adoption of this report and authorization to proceed.

10 00am Weslev Methodist Church Cleanuo

Events shown in time zone: Pacific Time

Summary of Key Points

- Freeway litter makes a major negative impression on Bakersfield
- Caltrans cannot solve their problem due to budget woes and prison realignment issues
- City can take the lead for a positive change through a “delegated maintenance agreement” with Caltrans
- Funding available from Caltrans (\$250K or more)
- Additional potential funding available Kern COG (\$250,000) and through private sector donations into the Bakersfield Foundation
- Funds adequate for system-wide monthly cleanups
- No City funds or personnel (besides planning and scheduling)
- Bakersfield Homeless Center has insurance, experience and infrastructure in place to be a clean-up crew contractor
- Volunteers and other partners still welcome
- KBB/Solid Waste is prepared to implement and coordinate a schedule of clean-ups

Community Services Committee Meeting
Tuesday, February 26, 2013

The screenshot shows the RightFax FaxUtil interface. The window title is "RightFax FaxUtil" and the menu bar includes "File", "Fax", "List", "Tools", and "Help". The main area displays a list of faxes under the heading "All - All Faxes". The list is filtered for "Michelle Cruz [0]". The table columns are: Date/Time, To/From/File, Fax Number/, Pages/Bytes, Status, Account, Matter, Unique ID, Owner, Comment, and Folder. The table contains four entries, all with a status of "OK" and a folder of "All".

Date/Time	To/From/File	Fax Number/	Pages/Bytes	Status	Account	Matter	Unique ID	Owner	Comment	Folder
2/22/2013 1:36 PM	News Director	328-7537	1 pgs	OK			MCRS127747...	MCRUZ		All
2/22/2013 1:36 PM	Beale Library	631-9439	1 pgs	OK			MCRS127747...	MCRUZ		All
2/22/2013 1:36 PM	News Director	334-2685	1 pgs	OK			MCRS127747...	MCRUZ		All
2/22/2013 1:36 PM	Allan Krauter	868-3190	1 pgs	OK			MCRS127747...	MCRUZ		All

4 faxes listed
